Education

University of Maryland, Baltimore County

August 2018 - December 2022

- Bachelor of Science: Computer Science

Relevant Coursework

- Computer Security • Natural Language Processing • Parallel Processing • Algorithms
- Software Engineering • Operating Systems • Graphics in Games • Graphical User Interfaces

Software Projects

Shades of Autumn - <https://alexjadkins.itch.io/shades-of-autumn> 2022

- Designed and coded a 3D exploratory game created using the Unity engine with C# scripting.
- Coded systems such as a game manager, quest manager, ladder system, movement system, low resolution aesthetic, dialog system (fully scalable scripts to apply to any npc).

Voice Activated Vending Machine - <https://www.youtube.com/watch?v=g7SZy335YYw> 2022

- Coded a voice activated vending machine that may be used in Unity Projects.
- Used nixon-voxell's custom Unity package UnityNLP in order to train a Naive Bayes classifier model.
- Used the trained model in conjunction with the Unity's DictionRecognizer API in order to parse input from a microphone and facilitate an order.

Resizable Maze - <https://youtu.be/FqoloM5rYYg> 2021

- Using a growing tree algorithm, coded a maze actor in the Unreal Engine with a customizable size and seed.

Rainbow Simulation - <https://youtu.be/Z6f3oQz62oA> 2021

- Using six different rainbow simulation algorithms, coded and added an unreal blueprint node that will simulate a rainbow from one of the six available methods. These methods are detailed [here](#) and [here](#).

Skills

Languages

- Python • C# • C++ • Java • C • HTML/CSS • React/JS • Chapel

Toolkits

- Git • Unity • Unreal Engine 4 • NodeJS • Gatsby • GraphQL • Jira

Work Experience

Unity Game Engine Instructor - Code In The Schools
2022

May 2021 - December

- Taught courses on the Unity Game Engine accredited by the University of Baltimore
- Taught Unity game engine courses during the school year
